---

## SUMMARY

Highly-motivated employee with desire to take on new challenges. Strong worth ethic, adaptability and exceptional interpersonal skills. Adept at working effectively unsupervised and quickly mastering new skills.

---

## EDUCATION

Bachelor of Engineering (BE) in Information Technology from Gujarat Technological University.

---

## TECHNICAL SKILLS

- Proficient in React.js, Redux, and Material UI for building dynamic user interfaces.
  - Strong understanding of HTML, CSS, and JavaScript.
  - Familiarity with Git, GitHub, and npm for efficient version control and collaboration.
  - Knowledgeable in Next.js, Angular, TypeScript, and React Native, Node js, Express js, Mongo DB.
  - Skilled in problem-solving and committed to maintaining high work standards for timely and quality deliverables.
- 

## PROFESSIONAL EXPERIENCE

Technotery, Ahmedabad  
2022 - Present

Jan

### Front-End Developer/React Developer

#### Roles & Responsibilities:

- Developed functionalities with React.js using library methods for react creation, render, props, states (Redux), passing data between reusable components as well as performing Ajax calls.
- Integrated frontend components with backend APIs to fetch the data and render on the webpages.
- Used React-Router to turn the application into a Single Page Application.

- Design, develop and test HTML5, CSS3, MUI, JavaScript, and React.JS that meets accessibility and web browser standards for the website.
- Used Middleware, Redux-thunk in application to retrieve data from Back-End and to also perform RESTful services.
- Worked on debugging, testing, and fixing the existing bugs and adding new features in the application that follows responsive web design.
- Worked with the quality assurance team to fix all the issues reported via Zoho as well as team meetings.
- Extensively used Git for version controlling and regularly pushed the code to GitHub.

**Environment: HTML5, CSS3, JavaScript (ES6), Material Ui, Bootstrap, JSON, AJAX, Zoho, Jeera, React.js, React Native, Redux-Thunk, React-Router and GIT.**

---

## **PROJECTS**

### **Enterprise Resource Management:**

- Developed and maintained dynamic custom forms using Material-UI (MUI) for a streamlined and user-friendly design.
- Leveraged Redux and TypeScript for structured data management and efficient state handling, improving the overall development process.
- Implemented Role-Based Access Control (RBAC) to manage user permissions and ensure secure system access.
- Ensured system reliability by promptly addressing technical issues and optimizing performance.

**Technologies Used: ReactJS, JavaScript, TypeScript, MUI, Redux, Git.**

### **Authentication Workflow:**

- Developed an npm package for managing dynamic forms in React, bundled with Webpack for efficiency.
- Seamlessly integrate into React applications or add via CDN for quick setup.
- Simplifies form creation and management, enhancing usability for developers.
- Leveraged Webpack for fast and efficient delivery of the package's functionality..

**Technologies Used: ReactJS, Mui, npm, JavaScript, Git**

### **E-Procurement Software Development:**

- Managed dynamic forms and data with **Material-UI (MUI)**, creating

an easy-to-navigate user interface.

- Used **Redux** to efficiently handle and organize data, improving the consistency of the application's state management.
- Simplified data analysis by implementing **Datagrid Pro**, making data more accessible for users.
- Resolved software bugs and issues to enhance overall system stability and user experience.

**Technologies Used: ReactJS, HTML, CSS, JavaScript,Mui,Redux,Zoho, Git**

### **Event Management App:**

- Worked on a versatile event management app using React Native for both Android and iOS platforms.
- Contributed to the deployment of the app on both App Store and Play Store, enhancing its accessibility.
- Played a key role in resolving software bugs, ensuring optimal performance and user satisfaction.
- Implemented AsyncStorage for efficient data storage and integrated Firebase for seamless messaging functionality.

**Technologies Used: React Native,Firebase,npm, async storage,Git,jira**
